

Mute Terminal Crimping Machine

Mute terminal model ultra-quiet terminal machine, using high-tech frequency conversion technology; electronic accurate positioning; motor working noise is smaller than traditional terminal machine when crimping, and power saving; mold adjustment is more convenient and faster; avoid traditional terminal clutch, electromagnet And other common faults!

Funtion

- 1) Replaceable direct delivery mold, cross feeding mold, single terminal mold
- 2) The voltage is stable and the speed is high.
- 3) Computer terminal DC terminal Single terminal With terminal
- 4) Lightweight structure Easy to move the workplace, the operation sound is small
- 5) Support to use OTP mould, 2000style mould, single terminal mould

TECHNICAL SPECIFICATIONS AND PARAMETERS	
Punching force	2T
Pressure of air source	0.5-0.4MPA (clean air)
Motor power	0.75KW
Working Voltage	200-240V 50/60HZ
Trip	30mm
Working Efficiency	1000~2500Pcs/H depends on manual
Machine Dimensions(L*W*H)	275*225*670mm
Machine Weight	45 Kg
