

Semi-auto Soldering Machine

1. Adopt a special surface treatment, nice design.
2. New lean design, greater effective stroke of the same dimensions.
3. Suitable USB connector, PCB board, LED lamp board, electronic component, switch, motor, microphone connector, led lights, connectors, etc.
4. Novices can work proficiently.
5. Strong versatility, the soldering time and the amount of tin can be adjusted, and different fixtures can be replaced to solder different products.
6. Fast soldering speed, can solder multiple points at once.
7. PLC and touch screen design, easy to operate.

TECHNICAL SPECIFICATIONS AND PARAMETERS	
Air source pressure	0.4-0.8mpa
Drive Mode	pneumatic
Temperature Range	100-480°C
Temperature erro	±5°C
Working Voltage	AV220V
Power	150W
Machine Dimensions(L*W*H)	400mm*400mm*450 mm
Machine Weight	20kgs
