

Power Cord Test Machine

1. High quality component, modular design easy operate.
2. Accuracy test, enhance 30% test speed compared with the other DC plus tester.
3. Test cable type: single or double port for option
4. Save labor cost and improved output.
5. Automatic push out the qualify cable, and locking the defective product.
6. Software and hardware can be customized.
7. Test fixture tool can be customized by clients requirement, price depends.

TECHNICAL SPECIFICATIONS AND PARAMETERS	
Polarity	Break over, short circuit, open circuit, dislocation
Leakage current	Setting Range:0.5, 1.0, 2.0, 3.0, 5.0, 10mA
Internal High-Voltage Output	0---5KV(500VA) Adjustable
External High-Voltage Output	0---5KV(500VA) Adjustable
Operating Voltage	220VAC 12A 50\60 HZ
Voltmeter	High-voltage range:0-5KV
	Resolution:0.5 level
Insulation Voltage	Output Voltage:DC500V
	Insulation resistance Range:2,7,20,50,100,200MΩ
	Resolution:0.5 level
Voltage withstand time	Timing Range:0.1-99.9/S
	Min time for item measuring:0.3S
Wire sensitivity	>10pF
Barometric Pressure	<4 Kg/cm ²
OK Product	Automatic printing and push out, counting, and indicator ON
NG Product	Automatic model locking, counting,indicator ON and buzzer ringing
Size and Weight	(W)730*(D)530*(H)500 (mm),
Weight:	80KG
Other Functions safeguard	Automatic cutting, defective products and alarmed with voice prompt and light electric leakage, Short circuit ,overheating
